

**FORM 8 – ESCAPE/INTRUSION REPORT
CWD HERD CERTIFICATION PROGRAM**

Owners/cervid farm operators are responsible for reporting to the status assessor and appropriate provincial/territorial Ministry any cervids that have escaped and the intrusion of wild cervids into the premises immediately, or with reasonable promptness. The following report is to be submitted immediately with each case of an escape or intrusion, and the total number of cases reported included in the annual *Form 9 – Biosecurity Assessment*. An instance of a group escape or intrusion can be reported as a single event, however all cervids implicated in a group report will be subject to the same risk assessment.

Escaped cervids

- Farmed cervid(s) escaped and were never recovered. List information about each escape event separately including date, animal ID(s) of escaped animal(s), age of escaped animal(s) and details about the event:

- Farmed cervid(s) escaped and were dispatched but not tested. List information about each escape event separately including date, animal ID(s) of escaped animal(s) and details about the event:

- Farmed cervid(s) escaped, were dispatched and samples were submitted for CWD testing. List information about each escape event separately including date, animal ID(s) of escaped animal(s) and details about the event:

- Farmed cervid(s) escaped and were returned to the enrolled premises. List information about each escape event separately including date, animal ID(s) of escaped animal(s) and details about the event:

Intrusion of wild cervids

- Wild cervid(s) entered the premises, was (were) dispatched immediately and samples were submitted for CWD testing. List information about each intrusion event separately including date and details about the event:

- Wild cervid(s) entered the premises and subsequently escaped the intrusion unrecovered. List information about each intrusion event separately including date and details about the event:

- Wild cervid(s) entered the premises and remain with the enrolled herd. List information about each intrusion event separately including date and details about the event:

Note: The manner in which you deal with an escaped farmed cervid or the intrusion of a wild cervid may impact your CWD HCP status and in some instances may result in program suspension or revocation. Please refer to the Egress (Annex A) and Ingress (Annex B) Decision Trees in the *Standard Operating Procedures for the CWD Herd Certification Program: May 2023*.

Herd Owner/Manager:
