

Table of Contents

Section 1

BUSINESS	1
I'm thinking about going into sheep, what must I consider?	2
Where should I market my lambs?	4
Are there benefits to direct marketing (i.e. selling directly to the packer)?	5
What is the difference between live weight vs. dressed weight?	5
What should I consider if selling direct to consumers?	6
When should I market my lambs?	7
What are the lamb market cycles?	7
Does sheep biology impact the markets?	7
What is the impact of holidays and ethnic markets on lamb prices?	8
What should market lambs look like?	9
References	10

Section 2

HOUSING	11
What are the basics?	12
How much space do I need?	12
What is total confinement and why consider it?	13
How much lighting is required?	14
What are the watering requirements?	14
Can I outwinter my sheep?	15
What facilities are required for lambing?	16
Why ventilate sheep housing and how do I do it properly?	17
How can I provide good flooring for my sheep?	18
How should I store feed?	18
Where should manure be stored?	19
Where can I go for advice on constructing sheep housing?	19
References	20

Section 3

HANDLING	21
What do I need to consider when planning a handling system?	22
What should be included in a handling facility design?	22
How can I use sheep behaviour to my advantage?	24
What's the best method to catch sheep?	26
What makes a good herding dog?	27
How can sheep be restrained?	27
What technique should be used to tip sheep?	27
How should sheep be transported?	28
References	30
Additional resources	31

Section 4

FLOCK HEALTH	32
Why is it important to have a valid veterinary-client relationship?	33
What management practices should I employ to ensure a healthy flock?	33
How do I take a sheep's temperature?	34
What is the normal respiration rate for sheep?	35
What is the normal heart rate for sheep?	35
How can I reduce environmental stresses on animal health?	35
Can transportation impact sheep health?	36
How should I manage on-farm mortalities?	37
Why should I regularly vaccinate my sheep?	37
What are the most common vaccines used for sheep?	38
What are some of the common disorders that affect sheep?	39
How do I administer antibiotics to sheep?	41
How do I give a sheep an injection?	42
How do I insert a stomach tube?	45
References	46
Additional resources	46

Section 5

NUTRITION	47
What feeding system should I use?	48
What is the feed cost of production?	48
Are there other ways to reduce feed costs?	48
What should I be looking for in a sheep premix?	49
Should I mix my own feed?	50
Should I do a ration formulation?	51
Should I do a feed analysis?	51
What should I consider when planning feeder space and design?	51
How important is water?	52
What nutrients should I need to make sure the sheep receive?	53
What do sheep eat?	54
How should I feed for a healthy rumen?	55
How should I feed a gestating ewe?	56
What is flushing?	58
How should I feed a lactating ewe?	58
What is the importance of colostrum?	58
How should I feed lambs?	59
What is creep feeding?	60
How should I feed creep feed?	60
What should be in a creep ration?	61
Can I feedlot finish lambs?	61
Can I pasture finish lambs?	62
How should I feed replacement ewe lambs?	62
What are the nutrient requirements of rams?	62
References	63
Additional resources	63

Table of Contents

Section 6

GRAZING	64
What are the benefits of grazing sheep?	65
What are the principles of pasture management?	65
What are the types of grazing management systems?	67
What is stockpiling?	68
Can sheep help with noxious weed control?	69
What is the relationship between sheep and leafy spurge?	69
Can grazing sheep help with brush control?	70
Are sheep a good fit with forestry cut blocks?	70
Can sheep graze in riparian areas?	71
What are some of the challenges of grazing sheep?	72
How can I use manure to my advantage?	72
What should I know about sheep grazing behaviour?	73
References	73
Additional resources	74

Section 7

PREDATION	75
Did my sheep die due to predation or scavenging?	76
What killed the sheep?	76
Why are coyotes killing sheep on my farm?	80
Why is record keeping important?	80
Does the season and location of lambing affect predation?	80
What is the regional incidence of predation?	81
Can my management practices influence predation?	81
What guard animals can I choose from?	82
Can I use fencing to protect my flock?	84
Are there any other ways to control predators?	86
Is compensation available in my province?	86
References	87
Additional resources	88

Section 8

BREEDING	89
What is the natural breeding season for ewes?	90
How long is the estrous cycle of a ewe during the ovulatory period? ..	91
What are the signs of estrus?	91
Does the cycle of a ewe lamb differ from that of a ewe?	91
When do ewe lambs reach puberty?	92
When is the optimal time for breeding?	92
What is a silent heat?	92
What is the 'ram effect'?	93
How many lambs will a ewe have?	93
Does nutrition influence ovulation rates?	93
What is 'flushing'?	94
What should my ram-to-ewe ratio be during the ovulatory season? ..	94
How long should breeding exposure to the ram be?	94
How long are ewes pregnant?	95
Can sheep be bred outside an established breeding season?	95
Can the ewe's photoperiod be adjusted to breed out-of-season (i.e. in the spring)?	95
Can hormones be used to stimulate ewes to breed out-of-season? ..	96
How should the rams be managed for out-of-season and synchronized breeding?	96
Does weather impact breeding?	97
What is an 'accelerated lambing system,' also called a 'frequent lambing system'?	97
What are the requirements of a '3 in 2' system?	97
What is the 'Cornell five-star breeding system'?	98
How can you tell if a ewe is pregnant?	98
References	100
Additional resources	101

Section 9

WOOL	102
Introduction	1
Wool growth	1
Wool production benefits from good flock management	3
Characteristics of wool	4
Harvesting the wool	9
The marketing of wool	19
Selection for increased wool production	22
Final highlights for production of good fleece	24
Glossary of common wool terms	25
Acknowledgments	28
Conversion factors	29

Acknowledgements

A special thanks to those who helped in the development of the Virtual Tool Box, including Alberta Lamb Producers, Ontario Sheep Marketing Agency, Saskatchewan Sheep Development Board, Dr. Paula Menzies, Jennifer Woods and Mopani Communications Inc. An extra thank you to Dr. Paula Menzies and Jennifer Woods for use of their photos and illustrations.
